"Where You Get More of the Best for Less"

Democracy does not depend on who you elect to rule but on how you elect to live.

When I insist, you resist.

To get teamwork, give it.

You can't change the moral climate of the world by waiting to see which way the wind blows.

Democracy does not depend on what I think about the country. It depends on what I do about it.

ROAD-SENSE

**If You Value Your Life**

NEVER-NEVER-NEVER TRY TO BEAT A TRAIN TO A CROSSING. We want GOOD ROADS—and the government is to be commended for the extensive road building programme it has announced for 1948—but we want SAFE ROADS, too. Safety depends on YOUR vigilance and that of every driver.

### Increased Insurance Coverage for A.M.A. Members

Your membership in the A.M.A. gives you Automobile Accident Insurance coverage of \$1,500, increasing 10% annually to a maximum of \$3,000 instead of \$2,250 as formerly. The disability indemnity has been raised from \$15 to \$25 a week for thirty days. This is just one of the many benefits of membership in the A.M.A. Membership costs only \$10 for 12 months—less than a dollar a month.

The government has already given consideration to the inauguration of a system of Driver Training and Testing. All who are interested in reducing the toll of death and injury on our roads will endorse such a plan, and will join with the A.M.A. in urging its speedy adoption.

**It Pays to Belong to the A.M.A.**

**FOR SALE**—1939 Dodge Sedan in all round A1 condition. Well kept car. Has been used for pleasure only.  
See Wm. W. Wilde.

## Lethbridge Experimental Station

WINTER WHEAT

This season is proving particularly a favorable one for winter wheat in localities adapted to this crop where practically no winter killing occurred during the past winter in the varieties that are considered the most winter hardy.

The previous winter had proved one of the worst for winter wheat as many fields were lost from winter killing. It was unfortunate that those losses discouraged many farmers from seeding winter wheat last fall. Those who did seed it have found it a great advantage during this late wet spring to have at least a portion of their seeding operations disposed of and also to have now a crop of winter wheat which promises to definitely outyield their spring wheat.

Chemical weed killers have now been developed to the point where they are giving good satisfaction on the weeds which are generally most troublesome in winter wheat, particularly tumbling mustard and stink weed. The cost is not prohibitive and many farmers who have sprayed their fields this season look upon this method of weed control as a great advantage in winter wheat production. This is in agreement with experiments at the Experimental Station, Lethbridge.

In certain fall seasons grasshoppers prove destructive to winter wheat especially to crops sown before the middle of September. Investigators at the Dominion Entomological Laboratory, Lethbridge stated that results obtained to date indicate that grasshoppers can be kept well under control by spraying the fields with Chlordane, using the type of spraying machine commonly used for spraying weeds. This treatment is fairly expensive but by no means excessive on fields where grasshoppers are expected to be numerous. Spraying the marginal strips of the field is frequently sufficient. More information is required regarding the form of grasshopper control, but it has appeared quite promising to date.

## Summer CLEARANCE SALE
